Response to Amendment

1. Claims 1-10 rejected under 35 U.S.C. 103(a) as being unpatentable over WO (99/40170) is withdrawn in view of applicant's amendments

Response to Arguments

2. Applicant's arguments with respect to claims 1-10 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

4. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.

3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

5. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

6. Claims 1-10 are rejected under 35 U.S.C. 102(e) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Metzger-Groom (6,358,911).

Metzger-Groom disclose a detergent tablet containing a compressed portion and a non-compressed portion, wherein the compressed portion may be prepared having a plurality of moulds filled with different non-compressed portions (col. 12, lines 48-53). The compressed portion comprises a composition including surfactants, perfumes, fabric softening agents and builders (col. 12, lines 55-64). The surfactants include nonionic and anionic surfactants (col. 15, line 44-col. 20, line 63). With respect to the particle size, Metzger-Groom teaches that said particle size of the component depends kinetics and composition, however, it is desirable to comprise more than 500 micrometers and less than 1200 micrometers (col. 35, lines 30-35). With further respect to the pouch limitation, Metzger-Groom teaches that said compositions might be

dispensed in a bag or pouch (col. 49, lines 35-50). Note, see example 1, compositions D, E and G.

As this reference teaches all of the instantly required it is considered anticipatory.

In the alternative, the compositions of Metzger-Groom are silent with respect to the particles floating in deionized water.

It would have been obvious to the compositions of Metzger-Groom to float in deionized water because said compositions encompass the particle size of the particulate material and comprise similar benefit agents for the purpose of producing a compressed tablet in a pouch. Accordingly, one of ordinary skill in the art would have expected said composition to meet similar characteristics of the claimed invention, absent a showing to the contrary.

Conclusion

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
